

Cork Sheet / Roll
CAZ 470 Cork

Joint Sheets

CONSTRUCTION:

CAZ 470 Cork Sheet / roll

It is made of clean granulated cork mixed with resin binder, which is compressed to form block, then split into sheets. The sheets have properties of good resilience, good resistance to water, oil and solvents, and good compressibility and so on.

PARAMETER:

Distinguish from granule grade

Cork sheet(Granule grade)	Big	Middle	Small
Granules size (1/inch)	8-12	12-24	30-60
Tensile strengthKg/cm2	8	12	12
Compressibility100psi load %	15-40	10-30	5-25
Recovery %	75	65	60
Flexibility Multiple	15	12	15
Boiling water Resistance hour	3	5	5

According with the standard ISO4714.

Distinguish from density

Density	Low	Middle	High
Kg/m ³	270	320	380

DIMENTION:

Sheets:

950×640mm×0.8~100 mm (Untrimmed)
 915×610mm×0.8~100 mm (Trimmed)

Packing: Carton

950×640mm×300 mm
 915×610mm×300 mm

Roll:

1220mm×Length×1~6 mm

Cut gaskets:

Cork G470

Dimension according to drawings or specifications and standards.
